Lake 9	N/A	Good condition	Good	None
Lake 10	OK	Good condition	Good	None
Lake 11	OK	Good condition	Good	None
Lake 12	OK	Good condition	Good	None
Lake 13	N/A	Good condition	Good	None
Lake 14	OK	Brown algae in comer	Good	None
Mittigation Cell	Exposed	Good condition	Good	None
Wetlands	N/A	Quarterly working on exotics	Good	None

Comments:
 Overall area is being maintained in accordance to the contract. Staff continuing to meet wit vendor to review lakes and ensure any issues are being addressed. Weather conditions have started to slow down presenting cooler weather at nights and less rain. Over the summertime we did notice several areas begin to dry out due to lack of much needed rain in combination with extreme high temps. Many of these ar have shown strong signs of recovering and filling back up.

Comments:

Overall lakes are looking good with minimal issues outside of normal watter lettuce and some algae blooms. Staff continues to meet with lake vendor to ensure lakes are being treated in accordance with contractual agreement. Lake vendor continues to work through algae blooms, watter lettuce and prim rose grothws throughout westside. Water feature #5 continues to flow and is functioning with no issues.
